Professional Summary

Mid-level Software Engineer with ~4 years of experience building and maintaining production web and mobile systems. Currently acting as **PIC (Person in Charge)** for a logistics platform focused on **truck tracking and route optimization**, contributing across frontend and backend using React, Spring Boot, and .NET Core. Experienced in translating business requirements into scalable technical solutions, making implementation trade-offs, and delivering reliable features in collaboration with cross-functional teams.

Core Skills

- Backend: Java (Spring Boot), C# (.NET Core), Node.js, RESTful API design, performance optimization.
- Frontend: React, TypeScript, JavaScript, UI flow implementation, frontend performance optimization.
- Databases: PostgreSQL, SQL, schema design, client-specific database views, reporting.
- Mobile: Flutter.
- Tools: Git, Docker (basic), Google OR-Tools, HERE Maps API, OpenAI API, Cursor, Claude Code.
- Practices: Clean architecture, modular design, requirement analysis, trade-off evaluation.

Certifications

- **IELTS (General Training)** — Overall Band **6.5** (May 2025)

Professional Experience

Commsult Indonesia

Software Engineer (Mid-Level) | May 2021 – Present

- Acting as PIC for a logistics platform focused on truck tracking and route optimization, responsible for developing, maintaining, and enhancing core system features.
- Designed and implemented frontend and backend features for real-time tracking and route optimization using **React, Spring Boot, Google OR-Tools, and HERE Maps**.
- Led development of reporting features, including client-specific database views, supporting operational and external reporting needs.
- Improved system performance and scalability by refactoring large APIs into smaller services, optimizing backend response times, and improving frontend load performance.
- Delivered and handed over a warehouse dashboard and CMS integrated with **SAP**, later transitioned to another team for maintenance.

Accelist Lentera Indonesia

Software Developer | Mar 2020 – Apr 2021

- Maintained and enhanced logistics and delivery planning systems using **Vue, Angular, and .NET Core**, supporting operational workflows.
- Developed dealer financing and automotive invoicing systems using **React and .NET Core**.
- Improved delivery scheduling optimization and system maintainability.
- Improved code quality and maintainability through clean code practices and modular architecture.

Freelance Software Developer | Jul 2022 – Aug 2022

- Delivered an end-to-end dealer financing web application for an automotive client using **React and .NET Core**.
- Led requirements clarification, system design, implementation, integration, and deployment, working directly with the client.

Education

BINUS University — Bachelor's Degree in Computer Science (Software Engineering) | 2016 – 2020
